Acknowledgments

Clive Hart: Introduction to *A Concordance to Finnegans Wake*, pages 1-2, entitled 'Syllabifications', followed by Part Two, 'Syllabifications', pp. 345-459. University of Minnesota Press, Minneapolis, 1963.

N.B. This Lexicographic Series as a whole is primarily meant as **teaching material** for the larger half of Continental Europe, which, for practically three quarters of a century, was deprived of ready access to the experimental fiction and poetry of the world. All Western literary criticism was also banned. Hence, the imperative necessity of re-issuing a considerable amount of post-war discussions. **The Publisher.**

N.B. Not all *Syllabifications* placement errors have been specifically corrected everywhere, though we have done the maximum to set everything right.
GS & LV

Cover Design, Illustrations, and overall Layout by **Lidia Vianu**

Given the importance of James Joyce's *Finnegans Wake*, all postgraduates in English, Romanian, French, and German work on this research project as part of their normal and regular academic assignments.

By Way of Introduction:

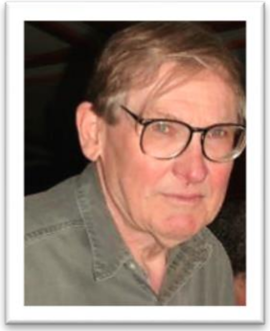

The Chopping Up of FW Lexical Items.

After having dealt with so many things in *Finnegans Wake* — from Song to Story, and passing through Motif and Allusion —, the most important operation has still not been done, and it remains to be done. That happens to be by far more important than all the Forty Languages taken together. And what is that? It is the chopping up of the words themselves in bits and pieces.

It did not take much time to be looking around in order to see that it had been done already — **alphabetically**. And long ago. As far back in time as the

early 1960's! Who by? This was done by the most competent lexicographer Clive Hart, who includes them as Part Two of his *Concordance* (pages 345 to 459) under the title of 'Syllabifications' (we prefer the term Segmentation — which happens to be the exact technical term in the field of linguistics called Word Building). The Selective Segmentation of *Finnegans Wake* covers 19 volumes, and 4,150 pages, in the **linearized** and **contextualized** form. Our modest belief is that the whole operation is of utmost importance.

C. George Sandulescu and **Lidia Vianu**

Clive Hart

Syllabifications

I have used this term to designate an alphabetically arranged list of the inner parts of the compounds and portmanteau-words. Thus from "paltipsypote" (listed under "P" in the Primary Index), "tipsypote" and "pote" are listed under "T" and "P" respectively in the Syllabifications. Usually the whole later part of the word is printed, in order to include as much as possible of the context of the relevant syllable or word-part. Thus "tipsypote" is listed, rather than "tipsy." With some very long words, however, the inclusive method grows rather unwieldy; in these cases the existence of further syllables after the one listed is indicated by a hyphen: e.g., "skawn-" (from the 100-letter word on page 3). The page/line number given is always that on which the whole word starts.

My principal object in syllabifying has been to put on show the English words hidden away in the portmanteaux, together with some of the most obvious of the other meaningful syllables. The points of syllabification are necessarily limited to what seem to me to be the most useful ones. The alternative, brute-force method of including everything by syllabifying at each letter would produce a hopelessly cumbersome list containing about half a million items—just twenty times as many as the present index.

From Clive Hart's Introduction to *A Concordance to Finnegans Wake*, pages 1-2. University of Minnesota Press, Minneapolis, 1963.
